

These trails are located close to Mullaghcarn ASSI. It is protected because of its special glacial landforms and range of nationally important habitats and species. Along your hike you can see a mosaic of upland heath, cut-over blanket bog and on the lower slopes, wet grassland. See if you can spot species like Hare's Tail Cotton Grass, Tormentil, Cross-leaved Heath or even the common lizard. Download the iRecord app and start recording wildlife during your walks.
